

## LAMB PUPPET

\*Materials used for making Lamb Puppet:

- 1 large square of white felt or other soft material
- 1 small square of pink felt
- 1 small square of red felt
- 1 small square of brown felt
- Scraps of black material
- 1 small square of fake lamb's wool
- 2 small covered buttons

\*All materials are available at a fabric store.

Use the white felt or other soft material for the head and body of the lamb. Cut the material according to the head pattern and attach the head to two pieces of material sewn together to fit the size of the puppeteer's arm and hand. Use the pink material for the inside of the lamb's mouth and the red material for lamb's tongue. Cut the lamb's ears according to the pattern and attach them to the head. Cover the buttons with black material and sew them in place for the lamb's eyes. As a finishing touch, add the fake lamb's wool to the top of the lamb's head.

This is a homemade pattern, and several variations should be used. It is hard to give detailed instructions because I did not follow a pattern. Use your own imagination and create your own lamb puppet.
